8185

Guided microwave level transmitter

- Universal level transmitter for liquids and bulk materials
- 4...20 mA/Hart 2 wires
- Insensitive to dust and steam
- ATEX approvals $\langle \xi_x \rangle$

Type 2301 (8692) Continuous TopControl system

Valve islands

PLC

Type 8185 can be combined with

The Type 8185 is a level transmitter with cable or rod probe, designed for continuous level measurement. The unit is suitable for liquids, but also for solids, for industrial use in all areas of process technology.

With measuring range of up to 32 m, the transmitter is best suited for tall vessels. Even process conditions such as strong steam generation, density fluctuations or changes of the dielectric constant do not influence the accuracy of the measurement.

Buildup or condensation on the probe or vessel wall do not influence the measuring result.

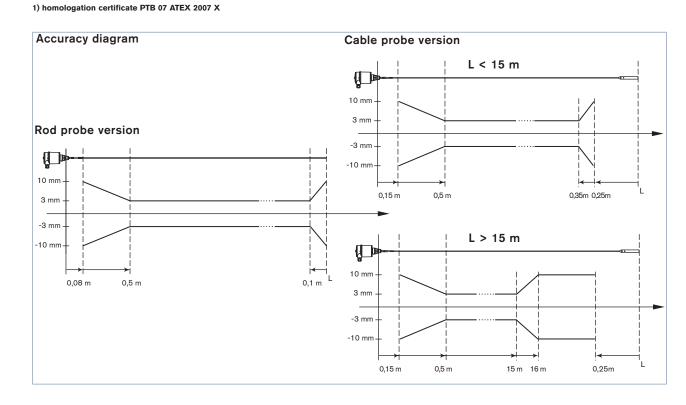

General data	
Materials	
Housing / Cover	PBT, Stainless steel 316L / PC
Seal ring / Ground terminal	NBR / Stainless steel 316L
Wetted parts	
Process fitting / process seal	Stainless steel 316L (1.4435) and PCTFE / FKM
Inner conductor	
(up to the separation cable/rod)	Stainless steel 1.4462
Rod-ø 6 mm	Stainless steel 316L (1.4435)
Cable-ø 4 mm with gravity weight	Stainless steel 316 (1.4401)
Display	LCD in full dot matrix
Weight	
Housing	890 g
Rod-ø 6 mm	approx. 220 g/m
Cable-ø 4 mm	approx. 80 g/m
Gravity weight (only with cable version)	approx. 325 g
Process fitting	Thread G or NPT - 3/4", 1"
Length	
Rod-ø 6 mm	0.3 4 m - Lateral load: 4 Nm
Cable-ø 4 mm	1 32 m - Max. tensile load: 5 KN
Electrical connections	Cable gland M20 x 1.5
Measuring type	Level of liquids and solids
Min. dielectric figure	εr > 1.6
Dead zone	
Rod-ø 6 mm	From top of probe: 80 mm - from bottom of probe: 0 mm
Cable-ø 4 mm	From top of probe: 150 mm - from bottom of probe: 250 mm
Measuring range	0.08 4 m or 0.15 32 m (see diagram on next page)
Process temperature	-40 up to 150°C (-40 to 302 °F)
Process pressure	-1 up to 40 bar (-14.51 to 580.1 PSI) (-1004000 kPa) (depends
	on the process fitting)
Temperature drift	0.06%/10K (Relating to the max. measuring range)
Accuracy	See accuracy diagram, on next page

8185

8185

Principle of operation

High frequency microwave pulses are guided along a steel cable or a rod. When they reach the product surface, the microwave pulses are reflected and received by the processing electronics. The running time is valuated by the instrument and outputted as distance. Time consuming adjustment with medium is not necessary. The instruments are preset to the ordered probe length. The shortenable cable and rod versions can be adapted individually to the local requirements.

Target applications with Type 8185

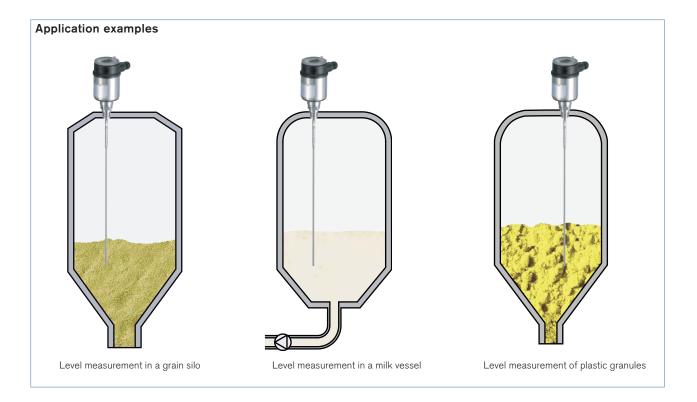

Foodstuffs and animal feed

Products such as beer, milk, wine, cereals, sugar, flour, coffee, cornflakes, cacao, instant powder, animal feed - liquids or bulk solids levels must be measured everywhere in the food industry.

The microwave principle works independent of products characteristics such as moisture, intense dust or noise generation, density, temperature, overpressure, foal, dielectric value and the shape of the material cone.

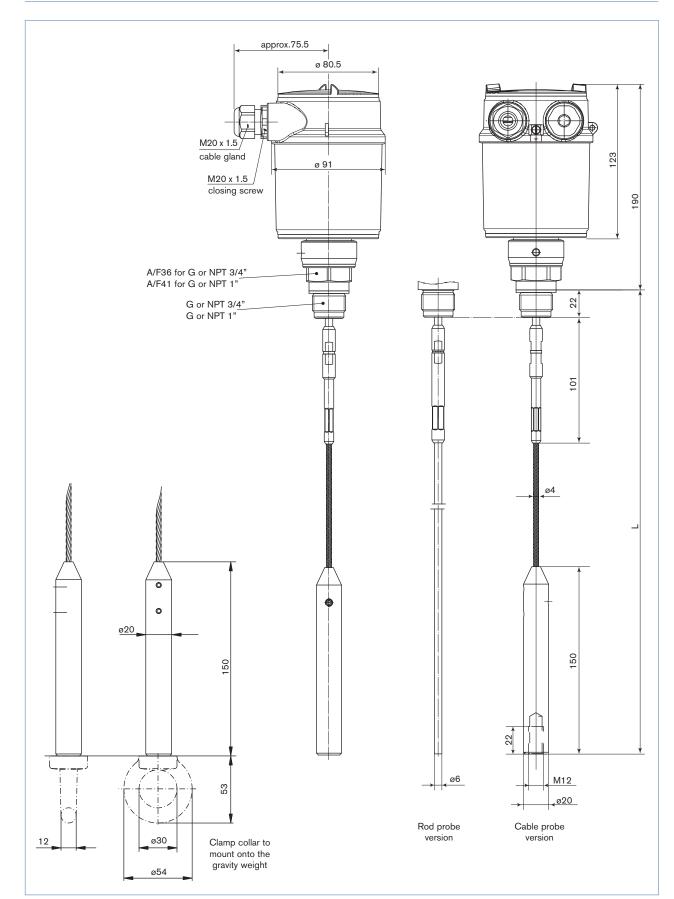

Chemical industries

Many finished products in the chemical industry are produced as powder, granules, pellets, solvents.... The different and sometimes fluctuating product characteristics place heavy demands on the level measurement. The measuring result is influenced neither by fluctuating product quality nor by dust generation, density, temperature, overpressure, foam or buildup.
